

## Connecting Guest\_WiFi-1x at Wi-Fi Here Hotspot (MAC OS)

Client configuration for 802.1x

The following steps apply to a computer running MAC OS. To configure a wireless client on other MAC platforms, see your MAC support documentations.

1. Click the Wi-Fi icon on the top right hand corner to show the available network list. Then click on the SSID name "Guest\_WiFi-1x"

- 2. When the above dialog appears, enter the fields as below:
  - Username: wifi
  - Password: wifi
  - 802.1X: Automatic

Check "Remember this network" and then click "OK".

The network	"PCCW1x" requires a password.
User Name:	wifi
Password:	••••
802.1X:	Automatic
	Remember this network

3. Click Continue for the dialog below

000	Verify Certificate			
	802.1X Authentication The server certificate is not tru settings.	usted because there are no explicit trust		
?	Show Certificate	Cancel Continue		

4. To verify the connection is successful or not, click on the Wi-Fi icon on the top right hand corner, then choose "Open Network Preference..."

5. If the connection is successful, the dialog should be the same as below 6.
